

FOREXTIME LTD

(Regulated by the Cyprus Securities & Exchange Commission)

EXECUTION QUALITY SUMMARY STATEMENT

Execution of Orders during 2021

Analysis and Monitoring of the Quality of Execution Orders in 2021 – A Summary

A. Preface

Further to the legislative provisions of MiFID II, and the Regulatory Technical Standard 28 (Commission Delegated Regulation (EU) 2017/576), Forextime Ltd (the 'Company') must abide to the standard stipulated in the abovementioned regulation as a duly licensed and regulated broker by the Cyprus Securities and Exchange Commission.

The Company provides below an ongoing view of the execution practices followed during 2021, by publishing annual information on the identity of execution venues and on the quality of execution obtained. The information presented below depicts the orders executed by the Company which is the sole execution venue. Moreover, the Company presents the execution factors taken into consideration and their importance level, any potential conflicts of interests, and the execution and price data summary.

B. Best Execution Factors:

The Company acts either as principal or riskless principal when executing Clients' orders. The Company treats the execution of orders of retail and professional Clients in the same manner and follows its Order Execution Policy to Act in the Best Interest of the Client.

During 2021, and as per the Company's Order Execution Policy and Policy to Act in the Best Interest of the Client, the Company assigned the following importance level for the below best execution factors when executing orders on the range of Contracts for Difference (the 'CFDs') and Shares it offers:

Factor	Importance Level	Comments
Price	High	We give strong emphasis on the quality and level of the price data that we receive from external sources in order to provide our clients with competitive price quotes. We do not however guarantee that our quoted prices will be as good, or better, than prices one might have seen elsewhere.
Costs	High	We take all sufficient steps to keep the costs of Clients' transactions as low and competitive as possible.
Speed of Execution	High	Execution speed and the opportunity for price improvement are critical to every trader, and we repeatedly monitor these factors to ensure that we maintain our high execution standards.
Likelihood of Execution	High	Even though we reserve the right to decline a client order, we aim to execute as many Client orders as possible.

Likelihood of Settlement	Medium	The Company proceeds with a settlement of all transactions upon execution of such transactions.
Size of Order	Medium	The volume and structure of the order affecting price.
Nature of Orders	Medium	The characteristics of the order may affect the execution of the order.
Market Impact	Medium	Some factors may rapidly affect the price of the underlying instruments from which the Company's quoted price is derived and may also affect the rest of the factors therein. The Company will take all sufficient steps to obtain the best possible result for its clients.

During 2021, the Company when executing orders for Retail Clients, the best possible result was determined in terms of total consideration representing the price of the financial instrument and the costs related to execution, hence these criteria were given precedence over the rest. Same precedence was placed when executing orders for Professional Clients.

C. Execution and Price Data Summary

- CFDs on FX
The Company acts as the execution venue when executing orders on CFDs on FX. Additionally, the Company may hedge its market risk with its Liquidity Providers. The prices provided to Clients are derived from pricing obtained from independent and EU-licensed Liquidity Providers, which operate under MiFID and/or are Swiss-licensed and regulated. The Company adds its mark-up and, as part of its monitoring, the Company benchmarks its prices to independent price sources on a random basis to ensure that execution of orders take place with market standards. The relevant arrangements and price sources are reviewed on a monthly basis.
- CFDs on Shares
The Company acts as the execution venue when executing orders on CFDs on Shares. The Company has a direct agreement with the New York Stock Exchange (NYSE) and the NASDAQ stock market, which provide direct pricing of the underlying shares to the Company. In turn, the Company provides the pricing to Clients together with the mark-up.
- CFDs on Indices
The Company acts as the execution venue when executing orders on CFDs on Indices. The prices provided to Clients are derived from pricing obtained from independent and EU-licensed Liquidity Providers, which operate under MiFID and/or are Swiss-licensed and regulated. The Company adds its mark-up.
- CFDs on Commodities and Metals
The Company acts as the execution venue when executing orders on CFDs on Commodities and Metals. The prices provided to Clients are derived from pricing obtained from independent and EU-licensed Liquidity Providers, which operate under MiFID and/or are Swiss-licensed and regulated. The Company adds its mark-up.

- **Shares**

The Company acts as the execution venue when executing orders on Shares. The Company has a direct agreement with liquidity provider so as to be provided with the access to trade stocks. The Company then passes this availability to its underlying clients. When the Company allows its clients to trade cash equities, a flat fee is charged to the client on a per trade basis.

Further to the above – and to the arrangements put in place by the Company's Dealing on Own Account Department – the Company strives to offer the best possible result to its clients when executing their orders on a consistent basis. By offering prices received by our Liquidity Providers, including our mark-up/ commission depending on the account, the Company ensures that the prices provided are the best at the time, even though we do not guarantee that our quoted prices will be as good, or better, than prices one might have seen elsewhere.

D. Conflicts of Interest

A conflict of interest arises when there is a reason, within the Company's control, that prevents the Company from putting the interests of its clients before those of itself and its employees, or the interests of one Client or group of Clients ahead of another Client or group of Clients. In such a situation, the Company must pay due diligence to the interests of each Client and manage any potential conflicts of interest accordingly. The underlying principle that must be followed at all times is that the interests of a client must always be put before the interests of the Company and/or its employees. A conflict may exist, or be perceived to exist, if an employee's activity is – or has the reasonable appearance of being – inconsistent with the best interests of the Company's Clients.

Additional information on handling conflicts of interest is available on the Company's [website](#).

E. Data and tools relating to the quality of execution

During the year under review, the Company employed an array of in-house tools to evaluate and the quality of execution offered to its Clients, as part of its overarching best execution requirement, among, others, as follows:

- Monitoring of the fairness of slippages experienced during the trading hours;
- Post-trade evaluation of execution of orders, by comparing own prices with the pricing offered by independent third parties;
- Furthermore, monitoring of:
 - Instrument depth liquidity;
 - Likelihood of execution;
 - Speed of order execution;
 - Requotes percentage during trading hours;
 - Spreads at various timeframes both during night and day hours to avoid any abnormalities in the execution of clients orders;
 - Any technological failures (e.g., connectivity issues, platform issues etc.);
 - Abnormal market conditions (e.g., error quotes, price gaps etc.)

Monitoring of the execution quality is carried out by the Dealing on Own Account Department. The results of the monitoring are provided to Company's Compliance Function for evaluation and assessment. The Company's Internal Audit Function also runs an independent check on monitoring and best execution practices followed by the Company. The results are presented to the Company's Senior Management.

F. Additional affirmations

In the context of the relevant regulatory provisions the Company during 2021:

- Did not use any close links when executing Client orders;

- Did not use any execution venue to execute orders where it has common ownerships (as it is the sole execution venue when executing orders with its Clients);
- Did not identify any additional conflicts of interest further to the ones described in Section D. above and further to its Conflicts of Interest Policy;
- Did not have any specific arrangements with any execution venues regarding payments made or received, discounts, rebates or non-monetary benefits received;
- There was no change in the execution venues;
- No output of a consolidated tape provider was used as this not applicable to the Company's line of business;

G. Conclusion

During the year 2021 and based on the Company's best execution arrangements and monitoring, we believe that the Company has taken all sufficient measures to obtain the best possible results for its Clients.
